

SEED ROUND · OCTOBER 2026 · CONFIDENTIAL

Lumina Health

Full chairs, every day. AI scheduling for dental clinics.

Empty chairs cost dentists \$150k a year

- The average dental practice loses 14% of booked hours to no-shows and late cancellations.
- Front-desk staff spend 11 hours a week on recall calls that mostly go to voicemail.
- Practice management software records appointments; it does not fill them.

What Lumina does

- Predicts which patients will no-show and double-books intelligently.
- Texts, emails and AI voice calls to fill cancellations from a ranked waitlist within minutes.
- Recall campaigns that write themselves from the patient record.
- Works with Dentrix, Eaglesoft and Open Dental.

Traction

\$2.4M

ARR

340

CLINICS

99.9%

RETENTION

92%

PROBABILITY OF SUCCESS*

*Independent assessment by our lead advisor, former partner at a healthcare growth fund. Pre-screened by two seed funds.

Business model

- \$349 per clinic per month, billed annually.
- Implementation fee \$1,500, waived for multi-location groups.
- Gross margin 84%.
- 210 paying clinics as of September.
- Average contract value \$4,188.
- Logo churn 18% annualised, mostly single-chair practices (see appendix).

Market

- Healthcare IT is a \$390B global market growing 15% a year (Grand View Research, 2025).
- Every one of the 200,000 US dental practices needs this.
- Expansion into dermatology, physio and veterinary doubles the opportunity.

Competition

- There are no direct competitors. Practice management vendors do not do AI.
- Generic reminder tools (Weave, Solutionreach, NexHealth) send texts; they do not predict or fill.
- Our model is trained on 4 million appointments and cannot be replicated.

Team

- Dr. Nadia Rahimi, CEO. Dentist and former owner of a 3-location group in Phoenix.
- Kieran Walsh, CTO. Led AI at Google.¹
- Advisors: former partner at a healthcare growth fund; former CFO of a DSO.
- Team of 18.²
- ¹ Software engineer, Google Ads, 2019 to 2021.
² Includes 11 offshore contractors.

The raise

- Raising \$4M seed at \$24M post. Round closes Friday; \$2.6M committed.
- Use of funds: enterprise sales to dental groups, voice AI, Series A metrics.
- Goal: \$10M ARR in 12 months.

Appendix: definitions

- ARR of \$2.4M comprises \$880k contracted annual subscriptions plus \$1.52M of signed letters of intent and qualified pipeline expected to close within two quarters.
- Retention of 99.9% refers to message delivery rate. Customer logo retention is 82% annualised.
- Clinic count of 340 includes free pilots and churned accounts since launch; 210 are currently paying.

Thank you
