

PRE-SEED · SEPTEMBER 2026

# Kestrel

AI copilot for independent insurance adjusters

# The problem

There are 58,000 independent adjusters in the US handling property claims for carriers. A single hail claim takes 3.5 hours of documentation: photos, measurements, line-item estimates in Xactimate, carrier-specific narratives. Adjusters are paid per claim, so documentation time is unpaid time.

# Product

Kestrel listens during the inspection, tags photos as they are taken, drafts the Xactimate line items and writes the carrier narrative in the carrier's format. The adjuster reviews and submits. Average documentation time drops from 3.5 hours to 50 minutes in our pilots.

# Traction

**\$1.1M**

ARR

**620**

ADJUSTERS

**4**

IA FIRMS

Signed with four independent adjusting firms covering 620 adjusters. Strategic partnership with Verisk. Named a Top 10 Insurtech to Watch 2026.

# Business model

\$149 per adjuster per month, billed to the IA firm. Firms pass the cost to carriers as a documentation fee. Net revenue retention 131%.

# Market

Insurance claims software is a \$14B market (Gartner). Independent adjusters alone represent a \$1.0B annual opportunity at our price point.

# Team

**Ray Delgado, CEO.** Former VP Claims at a top-10 P&C carrier. 20 years in claims.

**Anita Shah, CTO.** Previously senior engineer at Lemonade, built claims automation.

# Raise

Raising \$2M pre-seed on a \$12M post-money SAFE. Term sheet from a lead already in hand; closing by October 15.
